The <body> Tag
================
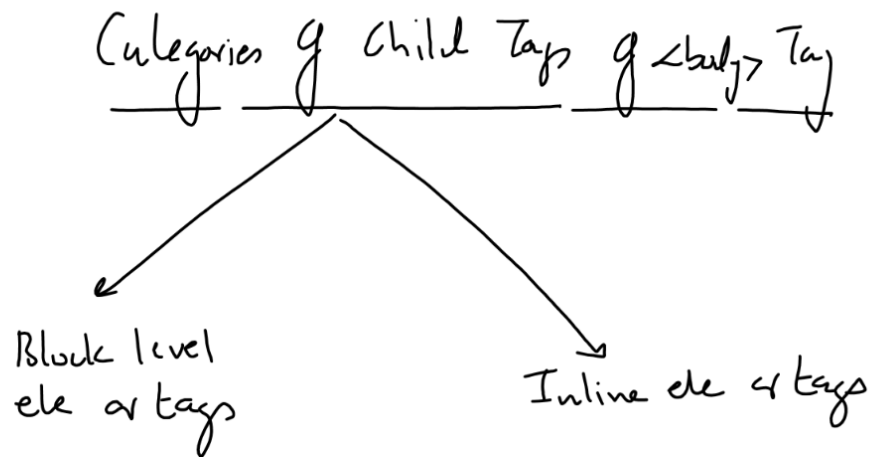

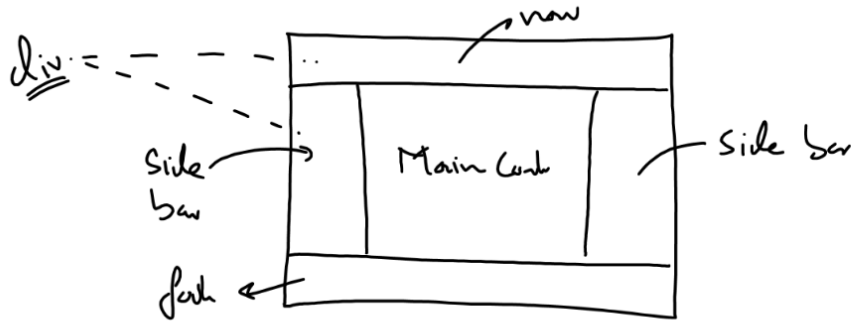

1. We use <body> tag to add the content to our web page which is to be shown to the user.
2. All the tags which are not child tags of <head> are child tags of <body> like <p> , <table> ,<img> etc

Categories of child Tags of <body> Tag

Block level ele or tags

Inline ele or tags

What are block level elements ?
==========================
1. These are those elements which cover the entire row in which they are displayed.
2. Any element added after them auotmatically gets shifted to a new line.
3. Some popular block level tags / elements are <p> , heading tags,<div> etc

What are inline level elements ?
==========================
1. These are those elements which cover only that much width on the row which is equal to their content.
2. They do not have any default formatting of their own.
3. Some popular iniline elements are : <img> , <a> ,<span> etc

The <p> tag
=============
1. It is a BLOCK LEVEL tag.
2. We use it to display some text on the page.
3. They automatically generate a newline at the beginning as well as at the end .
4. By default paragraps are kleft aligned but we can change rthe aligned using CSS or using align attribute in HTML.
Syntax
======
<p align="left | right | center"> text </p>
