2. <base> tag:

    1. It is the child tag of <head> tag

    2. We use it to set the base url (path) for <img> , <a> and <link> tag.

    3. Syntax:

        <base href=" base path " >

  Ex:

        <base href="media/images/">

3. <style> Tag:

    1. It is also child tag of the head tag
    2. We use it for applying CSS Rule Sets on the current HTML page
    3. Syntax:

```
<selector>
{
    <property>: <value>;
}
```
Ex:
```
p
{
    color: green;
}
```
